

## IDEAL CERA

### Metallic wax

#### DESCRIPTION

IDEAL CERA is made of metallic acrylic polymers that give the floor a significant aesthetic effect as well as increased protection, making it self-polishing without the need for polishing machines.

IDEAL CERA will work on concrete, Micro-topping, Decorative Epoxy, Urethane or Ideal Sealers as a protective coating. The benefit of using Ideal Metallic Wax is to produce a sacrificial layer between foot traffic and the actual finished floor. IDEAL CERA is designed for long term surface protection for interior floor finishes. Working as a sacrificial layer to protect the underlying finished floor, Ideal Cera can be easily maintained and reapplied.

#### FEATURES

- Water-based product, non-toxic
- Excellent adhesion to substrate
- Easily restorable
- Apply with brush, roller or spray

#### PREPARATION OF THE SURFACE

The surface must be clean, healthy and free of loose particles and oil stains. It is recommended to wash the surface with a degreaser type Ideal Work product before applying IDEAL CERA.

#### APPLICATION

IDEAL CERA can be applied with a wax spreader, a roller or airless pump. We recommend that two coats be applied. Dilution 1:1 with water.

#### TECHNICAL INFORMATION

APPEARANCE	Milky white liquid
FLASH POINT	Non-flammable
BOILING POINT	>100°C
SOLUBILITY	in water
SMELL	Typical
PH	8-8,5 circa

#### PACKAGING AND STORAGE

IDEAL CERA is available in 5 -10 - 25 l cans.  
In the original packaging and when stored at 10-30°C, the product will last for 12 months.

#### CONSUMPTION

About 25-40g/m<sup>2</sup>.

## CLEANING OF TOOLS AND HYGIENE PRECAUTIONS

- To clean tools, use only soap and water.
- It is recommended to wear gloves and a protective suit and eyewear.
- In case of contamination, wash with soap and water.
- Spray in the eye should immediately be washed with running water for 10-15 minutes, then consult your doctor.
